Call to Order and Welcome

The meeting, at which a quorum was present following proper notice, held in the Cafeteria Conference Room at MyMichigan Medical Center Alpena and via Microsoft Teams was called to order by Nicholas Harrison at 8:00 am.

Discussion Topics

We are currently in the process of a State Model Protocol Update.

Harrison discussed Revised Section 3 Adult Treatment protocol:

- Glucagon will be for paramedic use only (IM only)
- Do we want to use a specific MCA approved stroke scale? (no changes)
- EMT's will have albuterol.
- MFR will have EPI PENS (they already have EPI PENS)
- EMT Specialists will be able to give Atrovent
- Paramedics already have solumedrol
- Seizures paramedics will continue to give midazolam and ketamine.

After some discussion, it was moved, supported and carried to approve the Section 3 Adult Treatment revisions.

Harrison discussed Revised Section 4 Obstetrics and Pediatrics Protocol.

- Glucagon will be paramedic use only (IM)
- Mag sulfate for severe preeclampsia will be PRE radio.

After some discussion, it was moved, supported and carried to approve the Section 4 Obstetrics and Pediatrics Protocol revisions.

Harrison discussed Revised Section 6 Pediatric Cardiac Protocol

- Amiodarone or lidocaine for pediatric antiarrhythmic? (Both)

Northeast Michigan Medical Control Authority
Regular Meeting of the Board of Directors
March 8, 2023

After some discussion, it was moved, supported and carried to approve the Section 6 Pediatric Cardiac Protocol revisions.

Harrison discussed Revised Protocol Release Batch

- Sedation options are Midazolam, Fentanyl, and Ketamine (7-17) (No diazepam)
- Pleural decompression yes for adult and pediatric (Nick to look for catheters without flow restricting valve)
- MFR's currently check blood sugars
- MCA option for BLS agencies using capnography.
- Interfacility high flow nasal cannula, yes, MyMichigan EMS currently uses this checking the box for MCA approved training through our respiratory department.
- Mechanical Chest compression device, yes. We currently have agencies that use these. Nick to list the ones in use.
- ALS to BLS transfer of care will need discussion (Yes, with close monitoring)
- Intranasal medication is currently used for Narcan at the MFR level, EMT's will be utilizing albuterol for wheezes.
- Personal metered dose inhaler will need discussion. (Yes)
- We currently do NOT participate in the Narcan leave behind program.
- MFR agencies currently have EPI PENS

After some discussion, it was moved, supported and carried to approve the Revised Protocol Release Batch.

Other Business

There was no other business.

Adjournment

There being no further business, the meeting was adjourned at 8:40 a.m.
